

Requirements

for your own engraved design

Please send the rendering in scale of **1:1** in **.dxf**, **.dwg** format or in **.pdf** format in **vectors**.

- The **dimensions** of the baking tray is 200 x 120 mm. The offset of the engraving from the edge of the tray is 5 mm. The **maximum dimension** of the rendering must be 195 mm in length and 115 mm in width (see Figure No. 1).
- **The lines** must be like entities (**curves**, circles, points). The rendering must be drawn with a center line (NOT double). The engraving tool copies the **center line** (see Figure 2).
- **The thickness** of the engraved lines on the tray will be **1.1 mm ± 0.1**. This fact must be taken into account when preparing the sketch.

Once the renderings are received, they are checked to ensure that they are in accordance with the above requirements followed by a consultation with the customer.

The price includes a maximum of 3 hours of work. Should the complexity of the design require extra work, we will consult with you in advance. Each **additional hour of work** will be charged at **25.00 euros** / hour.

After processing the rendering for engraving, we will send you a Consent / Correction of the Customer's Engraving form before continuing with the actual engraving process.

We begin processing your rendering for engraving only after payment, or transfer of funds to our account, has been completed. Payment IN ADVANCE BY BANK TRANSFER.

Thank you in advance for your cooperation :)

Your Wafee team

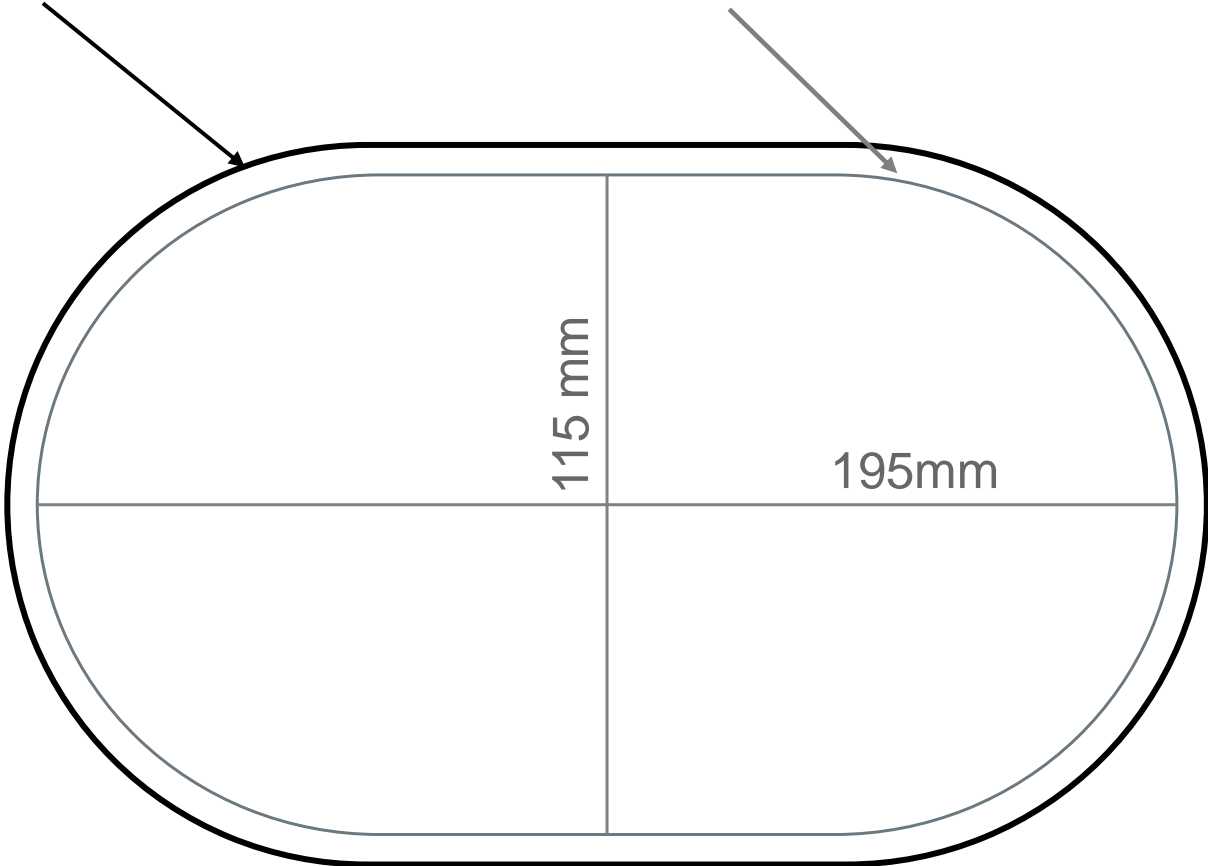

Picture no. 1

Maximum dimensions for design of engraving

Tray 120 x 200mm

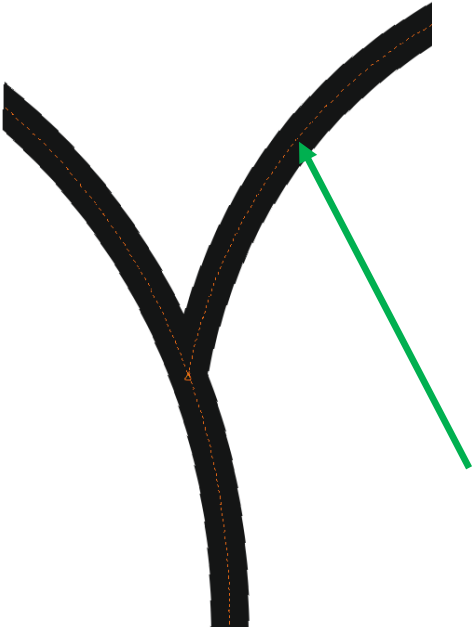

Engraving 115 x 195 mm

Picture no. 2

How to draw curves (line) - Example „ Y „

Centerline curve – YES

Double curve - NO
